Higher Education: On a Mission

OWENS COMMUNITY COLLEGE
2007 ANNUAL REPORT
Mission: Planning Success

The mission of Owens Community College is our heartfelt belief in the success of our students and our communities. Our mission leads us to explore all the possibilities of giving access to higher education.

Owens Community College opens doors to learning. In 2007, we partnered with Toledo Public Schools to offer evening classes at Rogers High School. We collaborated with the Lucas County Commissioners to operate the Owens Learning Center within The Source in downtown Toledo. We invited Northwest Ohio educators and business leaders to our Findlay-area Campus to focus on workforce education and training needs for the success and vitality of our region.

Owens Community College opens minds to change. Your success is our mission. We approach challenges with creativity, and we persevere. Our mission advances the opportunities, earnings and health of the people living in our communities.

We promote urban high school students to be the first in their families to go to college. We advocate adult workers to return to college and complete their associate degrees. We keep tuition affordable. We tutor and offer flexible classes. We also provide on-site child care. We keep reinforcing our message in all that we do. We are Higher Education!

As part of the University System of Ohio, we will collaborate and inspire Ohioans and their children to aspire for success. As educators, community leaders and citizens, we embrace this unique challenge. We lead the change in creating a “culture of educational attainment’’ in Ohio. Education is a rich legacy that all Ohioans can give to their families and their communities.

Owens Community College is committed to Higher Education. Our Mission.

President

Vision

We believe in serving our students and our communities. Your success is our mission.

Owens faculty and staff are committed to strengthening the community by providing a superior educational experience through excellence, innovation and collaboration.
Police, fire and emergency medical personnel have a new resource at their disposal with the opening of the Owens Community College Center for Emergency Preparedness. Located on 110 sprawling acres, this regional facility provides an area for first responders to practice rescue and recovery maneuvers on full-size training props in a controlled environment.

“The mission of the Center for Emergency Preparedness is to provide first responders and students with training opportunities that support classroom learning through the use of state-of-the-art educational resources,” said Wayne Seely, Assistant Professor of Law Enforcement.

Nearly 1,000 students trained at the facility from June 1 to November 30. The students represented 20 agencies, including the U.S. Dept. of Health and Human Services (Chicago office), the National Guard Military Police Unit (Toledo) and the City of Findlay Fire Department.

The multi-million dollar facility can provide a full array of training situations thanks to its multitude of training props. In addition to a mock city comprised of prefabricated buildings, the facility includes a gas station training prop, a railroad tank car fire trainer, a tractor-trailer tanker fire trainer and an aircraft fire prop, among others.

The facility will also include an emergency operations center with classrooms and laboratories and a maintenance/storage facility.

Over the next decade, the need for professionals trained to handle emergency situations is expected to grow by up to 25 percent. The $20.5 million Center for Emergency Preparedness will provide training to help first responders meet this increase.

**Mission:**

**Securing the Community**

**Wayne Seely**
Assistant Professor of Law Enforcement

**Grand Opening**

Nearly 1,000 community members and friends of Owens attended the Center for Emergency Preparedness’s grand opening, which showcased more than a dozen first responder agencies in action-packed demonstrations.

**The Center for Emergency Preparedness Includes:**
- A gas station training prop
- A car burn/extrication prop
- A burn building with a five-story fire tower
- A liquid propane tank fire trainer
- A mobile flashover container prop
- A railroad tank car fire trainer
- A tractor-trailer tanker fire trainer
- A confined space rescue area
- A collapsed building rubble pile
- An aircraft fire prop
- A shipboard fire prop
- A mock city using prefabricated buildings with facades to simulate business and residential buildings

**Donated FedEx Boeing 727**

The facility’s donated FedEx Boeing 727 aircraft prop allows first responders to conduct realistic, hands-on training in scenarios ranging from bomb and drug searches to hazardous-material emergencies and hostage situations.

We built it; they came. Since the ribbon-cutting ceremony for the new Community Education and Wellness Center on the Findlay-area Campus in March, companies are looking to Owens more than ever for their event needs.

One company, Ball Corporation, has already held several events, including a corporate conference, at the new center.

“We were one of the first companies to use the Center,” said Tom Martin, Plant Manager at Ball Corporation. “The business community has benefited from this investment.”

In addition to the Environmental, Health and Safety Conference, during which more than 100 members of the Ball Global leadership team were hosted, Ball also held its annual OSHA compliance training at the Center. The $4.2 million, 24,772 square-foot facility houses two shop bays, two computer laboratories, two traditional classrooms, a tiered classroom, a Multipurpose Room and a Wellness Center – all with WiFi.

Wireless Internet service allows clients to use laptops in conjunction with the material being presented during their training sessions, a bonus feature many businesses are looking for.

Approximately 30 training events were held at the Center in 2007, including events for Whirlpool and Cooper Tire. Nearly 1,000 students participated in these events.

“We have a mission to provide education to the entire community,” says Steve Hillard, Director of Community and Corporate Education. “This building has amazing potential for corporate education, training and community events.”
Advancing Community Education

For a lot of students, going to college is not a matter of desire. It’s a matter of access. Owens Community College’s mission is to make access less of an issue by offering classes throughout the community – not just on the Findlay- or Toledo-area campuses. In 2007, Owens began offering classes at The Source, Lucas County’s One-Stop Employment Center in downtown Toledo, and Toledo/Lucas County Public Library branches.

The response to this effort has been overwhelming. More than 160 students took classes at The Source during Fall 2007. Of those students, 83, including Latasha Hannah, were new to Owens.

“The Source is a great location,” the accounting major said. “I only have to take one bus to work and to school. It’s very convenient.”

Hannah, 21, currently works as a nurse assistant, but wanted to try a new path. She heard about the new Learning Center from a friend.

Accounting is one of more than 30 classes offered at The Source. Other courses include electricity, astronomy, basic algebra and public speaking. The 11,367 square-foot Learning Center provides the region with an array of expanded educational choices and options.

Highlighted features of the Center include five academic classrooms, two computer laboratories and a nursing laboratory, all with state-of-the-art technology and academic resources designed to enhance learning through hands-on instruction and exercises.

In addition to bricks-and-mortar classrooms, Owens is also known for its online offerings. In total, 219 classes are available online, including the Cancer Information Management Certificate, which debuted in 2007. With the addition of this certificate, Owens now offers seven degrees or certificates online.

eOwens enrollment was 21,613 in 2007, up more than 8 percent from 2006. Fall 2007 enrollment was 9,198, a 34 percent increase from Fall 2006.

Owens Enrollment

Mission: Improving Access
It’s not official yet, but once hydrologists with the U.S. Geological Survey finish their studies, the flooding that devastated Findlay in August 2007 is expected to be the worst ever.

Residents were displaced, schools were closed and possessions were lost, but wherever they could, students, faculty and staff on the Findlay-area Campus lent a hand.

“We all came together to help one another,” said Students Involved President Jenna Padron. “Students Involved and the campus as a whole are committed to supporting our community. We are proud to help”

And help they did.

Students Involved collected school supplies for Findlay Middle School; Owens students who lost their textbooks were given replacements at no cost; and the Owens Faculty Association gave employees affected by the flood a check to assist them with their needs.

“It was great to see everyone pitch in during this time,” said Judy Ennis, Executive Dean of the Findlay-area Campus. “It shows that we all truly do live by our mission to serve our community.”

The support wasn’t all on-campus – Findlay staff went to Findlay High School to help restore their computer system. And it didn’t end when the waters receded – Student Government and the Alumni Association collected cleaning supplies and gift cards for flood victims.

**Give Kids A Smile**

Oral hygiene, X-rays and fillings were the focus of free dental appointments at the College as more than 150 Northwest Ohio elementary and high school students’ teeth were transformed to pearly whites during the nationwide Give Kids A Smile Day.

**Findlay Flooding**

The Findlay-area Campus was set up as a Red Cross Disaster Relief Point following the devastating August flood. The campus grounds hosted Pee Wee football and soccer leagues holding practice and Central Middle School sixth-graders attending class. Many Findlay organizations and businesses also found meeting space on campus. And the Mormon Church used the College’s coolers for cold food storage.

**Student Government Community Support**

Student Government’s first-ever Dance-A-Thon raised more than $6,000 in support of Make-A-Wish. Student Government also raised funds for Relay for Life in 2007.

Mission: Helping the Community

Student Government Community Support

Student Government’s first-ever Dance-A-Thon raised more than $6,500 in support of Make-A-Wish. Student Government also raised funds for Relay for Life in 2007.
Working Together

In another industry, inviting the competition to your facility might be considered foolish. But at Owens Community College, where student success is our mission, collaboration goes a long way to meeting our students’ needs. That is why advisors from Bowling Green State University, Lourdes College and the University of Toledo have offices on the Toledo-area Campus.

“These advisors provide a valuable service to our own advisors and students in the area of transfer,” said Doug Bullimore, Enrollment Services Advisor. “Often they share information about transfer scholarships and other options that are available. I have heard nothing but good news from the students who have used the service.”

Kathy Sabbagh, Owens Express volleyball player and Office of Enrollment Services student worker, is one of the many students who have taken advantage of this service.

“The University of Toledo advisor, Jennifer McDowell, is very informative and friendly,” said Sabbagh, who will complete her Associate of Science degree in May 2009 and then transfer to the University of Toledo and major in nursing. “I go in to her all frazzled and not sure of what classes to take and she always calms me down and answers all my questions. She knows her job and does it well.”

Sabbagh recommends that all transfer students talk to the advisors on both campuses.

“It’s so much easier on you,” she explained. “You don’t know what transfers and what doesn’t transfer, but they do. And they’re right here on campus.”

Mission:

Free Flu Shots

Through the Owens Community College and University of Toledo Health Sciences partnership, free flu vaccinations were offered to the College population at the Student and Employee Health Services Center.

Health Center

In Fall 2007, the Student and Employee Health Services Center opened on the Toledo-area Campus with staffing provided by the University of Toledo physicians. The medical staff on campus offers services and consultations – primary and immediate care, physicals, allergy injections and other immunizations and services.

The partnership was designed to leverage resources and draw expertise for the mutual benefit of Owens students and employees. As part of the collaboration, the University of Toledo oversees operations and offers health services in the 1,030 square-foot center.

College Goal Sunday

The College partnered with financial aid counselors from area institutions to help high school seniors and their parents complete the Free Application for Federal Student Aid at this event on the Toledo- and Findlay-area campuses. Counselors came from Bluffton University, Bowling Green State University, Davis College, Lourdes College, Stautzenberger College, Tiffin University, the University of Findlay and the University of Toledo.

Academic All-Americans

Five Owens Community College student-athletes were selected to the 2006-07 Academic All-American Team by the National Junior College Athletic Association for their outstanding accomplishments in the classroom and on the athletic playing field.

Ryan Davis of Tucson, Ariz. (men’s soccer), Laura Gerkenmeyer of Genoa (women’s volleyball), Sarah Gerkenmeyer of Genoa (women’s volleyball), Justin McIntyre of Monroe, Mich. (men’s soccer) and Jeremy Sheeks of Bowling Green (men’s baseball) are among only 39 Owens student-athletes since 1994 to receive the award.

Mission:
Involving Students

With more than 50 clubs and organizations and seven Ohio Community College Athletic Conference sports, Owens has an extra-curricular activity for almost every student. And if a student can’t find a group they are interested in, new clubs are forming all the time. Nine new clubs started up in 2007 alone.

“Owens offers a wide range of clubs and organizations in health technology, education, activities, honor societies and special interest areas, so there is something for everyone,” said John Byers, Student Activities Coordinator.

Juggling school, work, families and extra activities isn’t always easy, but Byers says the reward is worth it. “The clubs and organizations at Owens offer students a great opportunity to be able to meet new friends, network within the College community, and develop a multitude of leadership skills,” said Byers.

In addition to meeting people, building leadership skills and staying active, participating allows students to give back to the community. Every year, Owens clubs, teams and organizations raise thousands of dollars and volunteer hundreds of hours for local causes.

In 2007, almost every organization gave back to the community in some way. Student Government volunteered at WTOL 11 on Election Night, registered more than 50 students to vote and raised money for Relay for Life and Make-A-Wish. The Health Information Technology Student Association, the Student Association for Young Children, the Student Physical Therapist Assistant Organization and the Student Nurses Association collected toiletries, clothes and toys for various organizations. And the Owens Environmental Club, the Black Student Union and Students Involved held other fundraisers. The athletic teams also got on board with several of the teams volunteering their time and collecting items for local organizations.

“Participating in a club or organization or on a team gives students the opportunity to connect to the community-at-large, helping various charities and outreach programs that the students have a passion for,” Byers said. “It’s a win-win for students and the community as both gain valuable resources. Students get to experience the joy in the gift of service to these charitable organizations while at the same time developing their own unique leadership style.”

Mission: Promoting Higher Education

When Owens Community College put its marketing campaign together for 2007, finding talent for the commercials was as easy as looking in the hall. After all, who better to testify to the College’s mission than the faculty and students who work and study here?

Owens alumni comprised another group to appear in the marketing campaign, and like the students and faculty, these graduates know firsthand that Owens truly is a smart value for higher education.

“The faculty, alumni and students in the campaign believe in the value of an Owens Community College education. That’s the importance of Owens,” said Dr. Gary Corrigan, Director of Marketing and Communications at the College.

The talent chosen for the commercials represented a wide range of the College’s population in an effort to show that Owens is comprised of multiple campuses, schools and areas of study. It is the sum of its parts – the best of many worlds.

The campaign, which included television commercials, billboards, direct mail and newspaper and radio advertising, focused on higher education values, a theme that the faculty, alumni and students were eager to talk about. Sharing their personal values and relationships to Owens cemented the genuineness of the award-winning campaign and aligned with the values of the College.

In Fall 2007, the campaign won a Gold Medallion Award from fellow community college marketing professionals confirming that the viewing – and judging – audiences related to the people telling the Owens story.

Owens Community College 2007 Annual Report

Owens student Nicholas Simmons has his eyes on the prize.

In addition to taking his final semester of classes, the 21-year-old owns his own business, participates in Big Brothers/Big Sisters, is in the Honor Society and is learning the corporate ropes from Tom Daniels, his Successful Connections mentor.

“I’ve always really wanted a mentor, someone to take me under their wings,” Simmons says. “I am learning a lot from Tom (Daniels, TNS, Vice President, Multi-Country Projects Inbound).”

Simmons and Daniels were partnered as part of the Alumni Association’s Successful Connections Program, which has a mission to connect alumni with second-year students to provide mentoring.

“Nicholas and I have both learned from each other,” Daniels said. “I strongly recommend all Owens alumni consider joining this program. We’re all here to help the students’ shoes and can have a positive impact in their development.”

The pilot program started in the School of Business and Information Systems in 2007. Alumni coaches introduced their students to a professional network, provided tours of their company, involved students with professional meetings and networking opportunities and assisted students with career development.

“Tom has opened my eyes to things I wouldn’t have thought about,” Simmons says. “He’s recommended books, shared his experiences and introduced me to people, who have in turn introduced me to more people. It’s a small world and I love building relationships.”

Detective Keith Dressel Memorial Scholarship
A $10,000 endowment scholarship fund was established in April to honor the memory of Detective Keith Dressel, who was killed in the line of duty in February. The Detective Keith Dressel Memorial Scholarship will be awarded for the first time in April 2008 to an Owens student who aspires to a career in law enforcement.

Owens Community College Foundation Scholarships
In fiscal year 2007, nearly $100,000 scholarships were awarded to students for their outstanding achievements. Approximately 200 students benefited from Foundation scholarships. An additional $194,000 was granted to the College for program support.

Backpack to the Future
More than 300 backpacks, 4,320 supplies and $1,200 were collected in the Backpack to the Future Drive. The donations were given to kindergarten students in need at 11 Northwest Ohio schools.

Alumni Legacy Endowed Scholarship Fund
The Alumni Association increased the student scholarship fund to more than $105,000 through efforts such as the Phonathon, in which over $6,400 in gifts and pledges was raised in 2007.

Owens Golf Classic
The fifth annual Golf Classic presented by Sky Bank raised more than $31,000 to support the alumni scholarship programs through the Owens Community College Foundation. The funds raised will be used for the Alumni Legacy Endowed Scholarship Fund and alumni outreach activities.

Mission: Continuing Success
Owens student Nicholas Simmons has his eyes on the prize.

In addition to taking his final semester of classes, the 21-year-old owns his own business, participates in Big Brothers/Big Sisters, is in the Honor Society and is learning the corporate ropes from Tom Daniels, his Successful Connections mentor.

“I’ve always really wanted a mentor, someone to take me under their wings,” Simmons says. “I am learning a lot from Tom (Daniels, TNS, Vice President, Multi-Country Projects Inbound).”

Simmons and Daniels were partnered as part of the Alumni Association’s Successful Connections Program, which has a mission to connect alumni with second-year students to provide mentoring.

“Nicholas and I have both learned from each other,” Daniels said. “I strongly recommend all Owens alumni consider joining this program. We’ve all been in the students’ shoes and can have a positive impact in their development.”

The pilot program started in the School of Business and Information Systems in 2007. Alumni coaches introduced the students to a professional network, provided tours of their company, involved students with professional meetings and networking opportunities and assisted students with career development.

“Tom has opened my eyes to things I wouldn’t have thought about,” Simmons says. “He’s recommended books, shared his experiences and introduced me to people, who have in turn introduced me to more people. It’s a small world and I love building relationships.”

Alumni Legacy Endowed Scholarship Fund
The Alumni Association increased the student scholarship fund to more than $105,000 through efforts such as the Phonathon, in which over $6,400 in gifts and pledges was raised in 2007.

Detective Keith Dressel’s wife, Danielle, and son, Noah, accepted the memorial scholarship in honor of her husband.

Alumni Golf Classic
The fifth annual Golf Classic presented by Sky Bank raised more than $31,000 to support the alumni scholarship programs through the Owens Community College Foundation. The funds raised will be used for the Alumni Legacy Endowed Scholarship Fund and alumni outreach activities.
Mission: Advancing the Arts

Whether it’s painting, singing, dancing or sculpting, students are always in motion at the Center for Fine and Performing Arts. Artists of all types can be heard and seen honing their crafts year-round, often in preparation for the annual student theater production or art show.

Fifteen students participated in the student theater production of “Earl the Vampire” in Spring 2007, while more than 50 students participated in the student art show later in the year.

This kind of hands-on experience is hard to find at many colleges, but theatre performance major Kari Duffy, who starred as Shana in “Earl the Vampire”, said that’s not the case at Owens.

“You don’t get lost in the shuffle here,” she said. “They see advancing the arts as part of their mission. There are more opportunities. You can step up and do things that you might not get to do at a larger university.”

Both the Center for Fine and Performing Arts Theatre and the Walter E. Terhune Gallery, where the student art show took place, also serve as venues for touring and exhibiting artists.

Thirteen national touring acts, highlighted by the “Complete Works of William Shakespeare (Abridged)” and the Family Fun Sunday shows, appeared on the Theatre stage in 2007. And nearly 6,000 visitors attended the eight exhibitions, including “The Art of Industry” and “Faces”, at the Gallery.

The Center also hosted productions by the Toledo School for the Arts, the Perrysburg Symphony and The Toledo Repertoire Theatre in 2007.

“It’s all happening right here,” Duffy said. “The Theatre and the Gallery are really important for students. You have the opportunity to see what life would be like pursuing a career in the arts.”

Kari Duffy
Owens Student
Theatre Performance Major

Steinway Baby Grand Piano

Owens Community College unveiled its new Steinway Baby Grand Piano in October 2007, when internationally known Canadian artist Michael Kaeshammer played at the Center for Fine and Performing Arts. Now College faculty and students rehearse on the $80,000 piano, considered by prestigious musicians and schools to be among the finest musical instruments in the world.

Findlay-area Campus Library Gallery

The new gallery promotes the visual arts on campus and offers a medium for students and local artists to display their work.

While studying abroad in Eastern Europe, Matt Gall expected to expand upon the skills he would need for a career in government or international relations. Instead, he made a life-altering decision. “For me, the food in Europe was just as memorable as seeing all the sights,” Gall said. “At that point, I finally figured out that cooking was my mission in life. It was something I truly enjoyed and wanted to keep doing.”

So he completed his bachelor’s degree in International Studies at Miami University, but instead of working for the government after graduation, the Toledo native registered for culinary arts classes at Owens. Now in his last semester of classes, Gall is excited to become a chef. He said this excitement is something he didn’t feel as he was about to receive his International Studies degree. “As I got closer to graduating with my bachelor’s degree, I grew less and less interested in pursuing a career in government or international relations,” he said. “I was always interested in other countries and learning about other cultures, but I figured out that the one thing I liked about other cultures was the cuisine.”

Gall was one of a record-number of students at Owens in 2007. Fall semester enrollment was up 6.9 percent from Fall 2006 and spring semester enrollment was up 3.9 percent from Spring 2006. Several of those students, like Gall, are coming to Owens for a career change. “If anyone is considering a change of careers, I’d suggest they make sure it is something they are passionate about and willing to work hard for,” Gall said. “Having the support of important people in your life is a major help as well. Overall, if it is something you want, go for it.”

Kelley Zolnai
Owens 2007 Graduate
Water Treatment and Safety Coordinator Studies

Brain Gain is a big topic at Owens Community College and graduates like Kelley Zolnai are proving that there’s no place like home – in Northwest Ohio.

Zolnai, who is employed by the City of Toledo as a Water Control Room Operator, said Owens gave him the chemistry, math, safety background and practical experience needed to prepare him for the position.

“For more than 40 years, Owens has prepared students for jobs available in Northwest Ohio. The College has a mission to promote growth in the communities it serves.

In 2007, the College’s total economic impact was more than $223 million when considering total expenditures and using a conservative 2.1 multiplier to estimate the ripple effect through the local economy.

The College spent more than $96 million in fiscal year 2007, and with nearly 2,000 employees, spent a total of $59 million on salaries and benefits. In construction projects in fiscal year 2007, the College spent nearly $4 million, with a majority of the funds allocated to the Center for Emergency Preparedness and the Community Education and Wellness Center.

Mission: Supporting the Community

Owens Community College collaborated with the Ohio Department of Transportation, Wood County, Perrysburg Township and Northwood on the federally funded $6.2 million CSX railroad overpass project on Oregon Road. This project:

• Benefits the College with right-hand and left-hand turn lanes
• Improves air quality as cars are not idling and waiting for trains
• Lowers operating expenses for trucks running on Oregon Road
• Increases economic development possibilities for the area
• Improves access for emergency vehicles
Mission: Supporting our Students

Since receiving a $1.7 million grant from the U.S. Department of Postsecondary Education to enhance and foster student success, Owens Community College has spent the better part of 2007 developing a staggering student success plan.

Part of that plan includes the implementation of the electronic portfolio project, which allows students to store papers, photos, video clips and other items in an electronic format. “In addition, the e-portfolio will allow students to showcase projects and activities that are of particular interest to future employers,” said Mindy Gray, instructor of the pilot study course.

Gray added that the e-portfolio project has received much recognition not only in the state of Ohio, but also nationally.

Other milestones in the student success initiative include becoming a Foundations of Excellence school and developing a new program expected to serve 2,500 students in the coming year.

“In total, by Fall 2007, this program involved at least 120 faculty and staff, and almost 1,000 students,” said Dr. Jason Tetzloff, Director of the College’s Student Success Initiatives. “This program is moving the College forward and making it a premier educational institution and a leader in helping students succeed.”

Mission: Continuing Leadership

The $1.7 million U.S. Department of Postsecondary Education grant is the largest grant or gift received in the College’s 42-year history. Owens was selected as one of only 34 academic institutions nationwide to receive the Title III, Part A, Strengthening Institutions Grant in 2006.

A consortium of educators and community leaders discussed various diversity issues relevant to black culture as part of a Black History Month panel discussion held Feb. 20.

Seventeen Owens students, faculty and staff spent their Spring Break rebuilding hurricane- and tornado-damaged homes in the Gulf Coast area. Drywalling, painting and other jobs were planning were some of their tasks.

The Information Systems Technology Network Security Certificate and Degree programs received national certification from the Information Assurance Courseware Evaluation Review Committee in March. Owens was the first college in the nation to successfully complete the course mapping required for certification on the first attempt. Owens is only one of two colleges in the state with this certification.

More than 700 students graduated during Spring Commencement. Michael P. Bell served as keynote speaker while Leslie Black, a Business Management major, spoke as class representative. Of the 702 graduates, 195 graduated with honors and 21 of those earned a perfect 4.0 grade point average.

First-generation college families learned how students can make a successful transition from high school to college at the Toledo-area Campus’ free Parent College 101 program. This free program began in June.

The Early Learning Center on the Findlay-area Campus had a year of firsts. In March, the Center began accepting 2-year-olds. In June, the Center held its first-ever Summer Camp for children ages 6-12.

Area basketball players learned the fundamentals of the sport at the Detroit Pistons 2007 Youth Basketball Training Camp held in the College’s Student Health and Activities Center July 23-26.

Three students were named to the 2007 All-Ohio Academic Team. The Ohio Association of Community Colleges and Phi Theta Kappa International Honor Society selected Renee Haas of Toledo, Deanna Hays of St. Mary’s and Joanne Reinhart of Fostoria for third team honors. Only 50 students statewide were chosen to receive this honor.

Owens partnered with 92.5 KISS-FM and FM 104.7 WIOT to offer the “The Tuition is Right” scholarship contest. The grand-prize winner, Jeremiah Frye of Toledo, won four semesters of free Owens tuition, while runners-up Gregory Staib II of Oak Harbor and Jerrilyn Piezer of Perrysburg each received one semester of free tuition.

Thousands of high school students and their parents attended College Preview Night and Greater Hancock County College Night to learn more about preparing for college while gathering information from the more than 100 colleges and universities.

Owens Community College’s Student Government joined fellow students, area residents and Owens employees in paying tribute to those who lost their lives in the Virginia Tech tragedy.

Workforce and Community Services was selected by Motorcycle Ohio to receive a $270,500 statewide grant to establish a Motorcycle Safety Training Program in Wood County, one of only 15 permanent training locations in Ohio.

The Volunteer Center of Wood County and the Findlay Area United Way awarded 27 AmeriCorps members a total $48,486 in grants. Of those, 20 were from the Findlay Campus and seven were from the Lima Campus.

Hundreds of high school students and their parents attended College Preview Night and Greater Hancock County College Night to learn more about preparing for college while gathering information from the more than 100 colleges and universities.

The Student American Dental Hygienists’ Association worked at the Michigan International Speedway over the summer to raise money to help offset the cost of State Boards. Over the course of two days, the students raised $2,000.

Hundreds of high school students and their parents attended College Preview Night and Greater Hancock County College Night to learn more about preparing for college while gathering information from the more than 100 colleges and universities.

The Student American Dental Hygienists’ Association worked at the Michigan International Speedway over the summer to raise money to help offset the cost of State Boards. Over the course of two days, the students raised $2,000.

More than 700 students graduated during Spring Commencement. Michael P. Bell served as keynote speaker while Leslie Black, a Business Management major, spoke as class representative. Of the 702 graduates, 195 graduated with honors and 21 of those earned a perfect 4.0 grade point average.

First-generation college families learned how students can make a successful transition from high school to college at the Toledo-area Campus’ new Parent College 101 program. This free program began in June.

The Volunteer Center of Wood County and the Findlay Area United Way awarded 27 AmeriCorps members a total $48,486 in grants. Of those, 20 were from the Findlay Campus and seven were from the Lima Campus.

The Findlay-area Campus achieved a milestone in enrollment by surpassing 3,000 students for Fall 2007. This is the largest single semester enrollment ever for Findlay.

The School of Business and Information Systems began offering three associate degree programs in Fall 2007 that can be earned completely on the weekend. Every school within the College worked together to expand the current weekend offerings. Students can now take more than 190 classes on the weekend.

The Child Care Laboratory earned accreditation from the National Association for the Education of Young Children in September. The Center was one of the first programs in the country to receive this prestigious honor given by the recently restructured NAEYC Accreditation system.

The College honored American service men and women at the Student Government’s Veterans Day commemoration event. A flag that flew above one of the battleships involved in Pearl Harbor was on display.

The Findlay-area Campus Student Nursing Association delivered more than 90 holiday gifts to children at Blanchard Valley Regional Health Center, Wood County Hospital, Lima Memorial Hospital, Mercy Hospital of Tiffin, Fremont Memorial Hospital and Fostoria Community Hospital.

In December, The Student Chapter of the Phi Theta Kappa International Honor Society and Student Government urged area residents to help in the fight against hunger and low literacy rates by donating a canned good or book as part of a worldwide initiative titled “Project Graduation: Feed a Body, Feed a Mind.”

College employees donated more than $23,377 for the annual Community Giving Campaign, which benefits the United Way of Greater Toledo, Findlay-Hancock County United Way, Earth Shares of Ohio and Northwest Ohio Community Shares.

More than 500 girls in grades 7-10 learned about Web pages, iPods, 3-D animation and more during “We Are IT”, a statewide initiative created to introduce female students to information technology applications and career opportunities.

The University of Findlay received the 2007 Community Partnership Award at the Findlay Community Appreciation Broadcast for outstanding dedication and service to Owens Community College. The University was selected for providing academic excellence to the greater Findlay area and beyond for the past 125 years and for its collaboration with the College.

Eric E. Fenger III, Chancellor of the Ohio Board of Regents, started International Education Week activities with a speech discussing the important role international education plays in the globalization of the economy. Mr. Fenger (third from left) was joined on stage by Owens international student graduate Victor Diaz (Mexico), International Student Services Administrator Cesar Hernandez, Owens international student graduate Ainhoa Emaldi (Spain) and Owens President Christa Adams, Ph.D.

Owens Community College received the 2007 Community Partnership Award at the Toledo Community Appreciation Event for outstanding dedication and service to Owens Community College as a result of their organizations playing instrumental roles in developing the College’s technology and high-speed communications.

Sponsored by the Literary Committee and the Toledo-Lucas County Public Library, a Charlie Sheeler, who wrote “Mockingbird: A Portrait of Harper Lee”, undertook the College to provide and encourage reading.

Buckeye CableSystem and Buckeye TeleSystem received the Campus Community Partnership Award at the Toledo Community Appreciation Event for outstanding dedication and service to Owens Community College as a result of their organizations playing instrumental roles in developing the College’s technology and high-speed communications.

James H. Hartung, President and CEO of the Toledo-Lucas County Port Authority, served as the keynote speaker. Isawaty Kasim, an Early Childhood Education Technology major, addressed the graduates as their class representative.
