JOB OPPORTUNITIES FOR GRADUATES

There are a number of skilled positions/careers available to students taking this program. Positions held maintenance technician, industrial mechanic, and millwrights.

According to the DOL Bureau of Labor Statistics the job outlook through 2022 is good. Nationally companies are looking to fill employment gaps ranging from 17% to 19% depending on the position. Locally we are looking at a skills shortage in a variety of skilled trade positions. With the current skilled workforce shrinking due to the large number of retirements and not enough new workers entering these fields to adequately replace those retirees; the demand has/is growing daily.

SALARY

The median annual wage for industrial machinery mechanics and maintenance workers and millwrights is \$45,840. The lowest 10 percent earned less than \$29,020, and the top 10 percent earned more than \$69,990.

Apprentices will make less than journeymen make, however they are on a progressive pay scale. Generally apprentices receive pay increases as they progress through their apprenticeship. As apprentices advance in their skills and are capable of working with limited supervision their rate of pay reflects that knowledge and skill advancement
