

VISUAL COMMUNICATION TECHNOLOGY

Associate of Applied Science

The Visual Communication Technology (VCT) degree provides the training required to succeed in the ever-changing technical graphics and documentation marketplace. Companies need commercial artists and graphic designers to produce layouts, presentations, videos and websites that are completed in an accurate, timely and appealing manner. Students will understand the fundamental principles of typography, vector design, photo manipulation, graphic design, digital video production, electronic page layout, package design, and the knowledge to produce finished interactive multimedia projects and webpages.

Students in the VCT program take courses utilizing the Adobe Creative Cloud. Students also have the opportunity to design for clients through on-campus service learning projects.

In the VCT program students create both traditional and digital portfolios while learning communication skills to prepare for work as a freelance graphic designer or in the field of visual communication.
